Dear promoter,

we are looking forward to our performance at your event. We are reliant on some technical requirements that we summarised in this technical rider. If there are any difficulties in fulfilling these requirements, please contact us in advance, so that we can find solutions or compromises.

These directions are part of the contract with sub5. If not agreed upon differently, the promoter provides stage, lighting and sound system. The promoter is responsible for any necessary copyright declarations and the provision of electricity. If the performance is at an open-air venue, the promoter cares for a roofed stage.

For our regular performance we need:

N°	Description
1	Free stage (minimum 3 x 5 m), black backdrop if possible.
2	Sound system: at least a high quality 2-way-active-stereo-system with a well-instructed operator (unless agreed upon otherwise). The sound system should be ready at the arrival of the band.
3	5 wireless microphones with transmitter system (if possible Sennheiser E865/965). Those items can be brought by sub5, if necessary.
4	Minimum one-way-monitor-system with at least 2 speakers in front of the stage.
5	At least 45 min. sound check time (for a full set/concert, 30 minutes for a short set).

The logo for Sub5, written in a stylized, handwritten font.

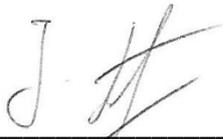

A CAPPELLA QUINTETT

Technical Rider

6	Sub5 doesn't bring a lighting system or engineer and therefore requires a ready for use system with a well-instructed operator or at least a well-lid stage.
7	At least one backstage room with mirror and access to sanitary facilities.
8	During the performance five 0,5l bottles of still mineral water at the side of the stage.
9	Sufficient and appropriate catering (also vegetarian options). Drinks and small snacks should be ready at the arrival of the band.

Please do not hesitate to contact us if you require further information. We look forward to a good cooperation.

Best wishes,

A handwritten signature in black ink, appearing to read 'J. Schäfer'.
